The Summary:

. . .

Provided data, citations, and papers (articles) can withstand, in my opinion, rigorous analysis. And yet, critique, suggestions are welcome, and anticipated. From submitted papers, and articles a new science is emerging, the science that is oscillating within defined, and rigorously analyzed data (based on available scientific sources), effort and the expense.

THE STRUCTURE OF THE ENERGY
&
CORRESPONDING ENERGY FIELDS
(beyond 10(-47)

- **THE SUPERPOSITION ORGANIC MATRIX** within infinite energies, yet, **Homogeneous Formula**: simulation beyond 10(-47).
- Summary: the Universe is pre-designed, non deterministic, independent of time, yet, composed of infinite Energies, and corresponding Energy Fields. The Universe is organic in nature, evolutionary, where simultaneous calculations within 0(1)momentum, infinitely divisible Energy(energies) fields project pre-designed, non-deterministic structure (formula) are, de facto, analog, and mathematical (organic) simultaneously.
- **The infinite energies superposition** within corresponding Energy Fields, project the composition of Energies & Energy Fields: sub-Quantum, Quantum, Atoms, Particles, yet, quarks, protons, neutrons, electrons, orbitals & shells, spectra (matter, antimatter), permeating Physical Laws (S(W), E(B), G(Gr). I would like to emphasize the notion of Gravity & Gravity Reversal Matrix. Without G(Gr) the Universe would collapse, and would not form in a way the Universe evolved 13.8 billion of years ago since the Initiation Sequence (the Big Bang).
- **The Superposition** (including entanglement, and non locality in particular), yet, Organic Matrix (beyond 10(-47), which contradicts the notion of time, especial for high velocity interactions (E(s)B(sc).
- Providing tangible, measurable scientific data that supports the notion: physics, mathematics, biophysics, music, mathematical constants, physical constants, evolution of language (alphabet), earth science, biology & anatomy, art, nature, chemistry, etc.
- The Universe is a living, interconnected organism within infinite, evolutionary within micro, and macro dimensions, Energies, and corresponding infinite Energy Fields (organic variables & sets,composed within superposition organic matrix), and Homogeneous Formula within infinitely divisible Energies, corresponding Energy Fields:
- sQ(Q) <=> 0(1)m <=> Q(sQ) <=> 0(1)m <=> A(P) <=> 0(1)m <=> P(A)... ,
- Analog(binary) <=> 0(1)momentum <=> Inorganic(organic) 0(1)m <=> Organic(inorganic) <=> 0(1)m <=> Binary(a).
- **The Binding Energies (Energy) & corresponding Energy Fields** within Atomic architecture indicates a new form of Energy simultaneously propagated & calculated, yet, permeated within simultaneous calculations & the momentum 0(1)m within the Energy(space)Binary(simultaneous calculations):
  * Binding Energies(Fields) <=> New Energy(field) Signature <=> Binding Fields (E): proton <=> quarks <=> neutron <=> electron
  * Binding E. Fields
  "The mass defect" is, de facto, kinetic permeating translations within Energies & corresponding E. Fields (I wrote about it in my paper & articles).

322. The Design(I, II, III):
*Superposition: Permeating Infinitely Analog(mathematical) 0(1)m Inorganic(organic)

*Alpha 0(1)m Beta & neurons: excited neurons propagate organic plasma: simultaneous calculations & 0(1)momentum (exp. the Triple Point & Periodic Table etc.)

*Universal Organic Matrix & the evolution in micro & macro scale(s) 10(-47) 0(1)m 10(6), sub-Quantum, Quantum, Atoms, Particles, yet, matter & anti-matter, emission & absorption, and yet, all of the above a new forms of energy with ingrained measurements, kinetic variables & sets, spatial coordinates. Kinetic spatial coordinates is the essence with regard to kinetic motion on the Universal scale from the Initiation sequence: predesigned, nondeterministic, independent of time.

Note: the conscience is a cumulative function within Analog(mathematical) dimensions & apparently within human being is(are) ingrained all forms of awareness ("Universal personalities"), as the highest in scale energies(fields), and yet, this sequence is still evolving. Awareness is a kinetic crystal & its domain is beyond time, and even space, while a human thought can surpass the speed of light in a vacuum (speed of light is not constant but calculated by the reference point(s). The analog(mathematical) simultaneous calculations & 0(1)m are time independent, and yet, organic.

The above notion is for the intelligent debate beyond cultural, religious, personal preferences, or worse, prejudice, yet, the objective of the debate is to grasp, according to the highest moral standards, the true image of reality, intuitively & experimentally.

*Superposition: Universal Spectrum,Vector(Scalar)Tensor(s), Algebraic Topology & infinite spheres-dimensions within a sphere (permeating vibrations & frequencies).

Homogeneous Formula within infinitely divisible & permeating E(s)B(sc) animate geometry within macro dimensions, while the interactive formula is ingrained within micro dimensions. And this is the function(s) within supersymmetry: symmetry, antisymmetry, compatibility, compatible opposite, and yet, infinite energies propagate corresponding E. Fields.

Infinite Energies & E. fields calculate via Analog(binary) 0(1)m Inorganic (organic), as well as kinetic crystals (geometry) evolutionary, subsequent Energies(space), dimensions.

The Energy(space)Binary(simultaneous calculations) “behave” (similar) like an organism, based on evolution, and yet, animate infinite awareness dimensions within A(B) 0(1)m B(A) & I(o) 0(1)m O(I).

Human, for example, is composed by permeating Universal forces, including permeating Physical Laws: S(W) 0(1)m E(B) 0(1)m G(Gr), including the Standard Model of particles, permeating infinitely fields-vibrations (frequencies), from which a new forms of Energies(fields) propagate E(s)space as we know it. Of course the Homogeneous Formula is far more complex as Variables(sets) 0(1)m V(s)Topology coordinates are never the same.

Organic Mathematics (beyond 10(-47).

Intuitively, we can anticipate (according to the evolution and and a variety of species, known & unknown) that there are also a new, unknown forms with regard to the mathematical interactions-functions, beyond simultaneous calculations or even a new mathematics altogether.

There is no doubt in my mind, that the Universe (beyond 10(-47) is an Organism, complete, interconnected & synthetized (beyond entanglement (spin +(-) & nonlocality, yet, (0(1)m within magnetism (N(S) & Electric field 0(1)m Magnetic field 0(1)m Photon(wave), virtual particles, etc., where virtually every kinetic in scale vibration(frequency) variable(s) & set(s) is transforming the reality: Vector(Scalar) 0(1)m Hz(m) 0(1)m Tensor(Topology) within micro & macro dimensions.

Subsequently the sphere is an infinite multidimensional Matrix, and yet, is transformed by the momentum 0(1)m, and is transforming sets(variables) via the 0(1)m momentum.

The Universe is predesigned, non deterministic, independent of time (time is a measurement not a dimension (high velocity interactions), organic, evolutionary & composed via infinite Energies & corresponding E.Fields with simultaneously ingrained aesthetic performance;
* Analog(binary) 0(1)m Binary(analog) 0(1)m E(s)B(sc) 0(1)m Inorganic(organic) 0(1)m Organic(inorganic).

THE ORGANIC UNIVERSE & MAN IS IN A STATE OF SUPERPOSITION:
sub-Quantum, Quantum, Atoms, Particles, DNA etc.

The ultimate truth: life, the Solar System projects organic composition, cellular biological composition.
. . .

Proof:
Energy(space) <=> 0(1)momentum <=> Binary(simultaneous calculations) <=> 0(1)momentum <=>Analog(binary)<=> 0(1)momentum <=> Binary(analog) <=> 0(1)momentum <=> Inorganic(organic)
<=> 0(1)momentum <=> Organic(inorganic):

Yet, life is protected by multilayered protection mechanisms & sequence. The Earth is the vessel, not just a
Planet, a vessel carrying the most precious data phenomenon, aware existence as well as a unique form of Energy
& Energy Fields within micro & macro superposition matrix.

There are infinite Energies & corresponding E. Fields, Subsequently there are also an infinite forms of
awareness, so is human composition with ingrained trillions of biological forms.

The kinetic structure of E(s)B(sc) Universe is organic within any given scale (as I attempt to prove since 1975).

The composition of the cell (independent & integrated) is identical with the Solar System, and beyond. The

predesigned, non-deterministic, time-independent.

Based on a tangible, empirical observation, and this is the conclusion:
* life is propagated on Universal scale, according to organic, cellular composition, and division(s), yet, Multiverse
could be considered as a probability (a new forms of Energies & corresponding Energy Fields reaching kinetic
scales undetectable to date (as well as kinetic crystals).

The evolution, since & beyond 10(-47), is a tangible indicator: the Universe reflects organic composition &
subsequently man animated by the Universe as well. Within each man is the Universe, it seems while analyzing
10(-47) Initiation Sequence.

250. The Design: Proof

* The Superposition Matrix & Organic Universe (beyond 10/-47s).
Homogeneous Formula within infinite energies & corresponding E.fields.
. . .
* What makes a NEW MATHEMATICS, Analog & Binary (simultaneous calculations) unique is a design of Analog <=> Mathematical spectrum(s), where division (divisibility) & multiplication is synonimous: Energy propagate Space, yet, Space divide Energy(infinitely).
Why 'particles" (permeating dimensions) behave the way they do?
Because of permeating simultaneous calculations within E(s)B(sc), kinetic network(s).
Multiplication divides, division multiplies,addition substracts, substraction multiplies E(s),

simultaneously.

* Within each instance, kinetic episode, excited "particle" trajectory is calculated, precisely, yet, reflect kinetic design, pre-designed, yet, non-deterministic within kinetic variables & sets (spatial coordinates, micro and macro, are infinite/unique).
Simultaneous calculations are based on addition, yet, substraction of the kinetic potential,multiplication & division(divisibility) within +/_E(s)B(sc): kinetic symmetry & anti-symmetry, compatibility & compatible opposite.

The notion of geometry in QM refers to spatial interactions within infinitely divisible E(s)B(sc), yet, permeating physical laws via momentum as a separate&integrated dominion within a "homogeneous" dimension(s), pre-designed, non-deterministic:
https://x.com/MARKQQ1/status/1749489857838158195?s=20

Mr. Einstein used the terminology of time-space, yet, contradicted in his book the essence of this notion by refering to it as a special case (a measurement) of course. Universe without G(reversal), momentum as a kinetic spectrum, simultaneous calculations etc. is incomplete:
https://x.com/MARKQQ1/status/1749491837885124852?s=20

3D Reality is infinitely divisible, we can implement anticipated dimension as a calculation/measurement, yet, "homogeneous", essential property of the world is E(s)B(sc) as a fundamental, pre-designed, egineered "mechanism" of the Universe:
